## Summary

---

Second-year Computer Science student with experience developing full-stack web applications and Java CLI tools. Strong foundation in object-oriented design and debugging. Seeking hands-on experience contributing to real-world software projects.

## Education

---

### University Of Dundee

Dundee, Scotland

*BSc (Hons) Computer Science*

*Expected May 2029*

- Predicted First-Class Honours (Grade Band A4 / 19 on 23-point Scottish scale)
- Data Structures & Algorithms, Mathematics for Computer Science, Object-Oriented Programming, Frontend Development, Unix Systems, Embedded System Development & Networking.

### Kemnay Academy

Aberdeen, Scotland

*SQA Qualifications*

*May 2019 - May 2025*

- Advanced Higher Computer Science – A, Advanced Higher Mathematics – A
- Higher – 4A's, 3B's

## Projects

---

### Clinical Pain Assessment App

*Jul 2026*

*TypeScript, Java, React Native, Spring Boot, PostgreSQL*

- Built a mobile app (iOS, Android) from a single React Native/Expo codebase, implementing 4 validated clinical pain-assessment scales.
- Built for clinicians to help streamline pain assessment processes by automatically calculating scores.
- Designed and built a REST API backend with Spring Boot and PostgreSQL to handle user accounts, patient records and assessment history.
- Implemented secure user authentication using JWT tokens with Spring Security.

### Typing Test Web Application

*Dec 2025*

*HTML, CSS, JavaScript, PHP, MySQL*

- Built a full-stack typing test platform supporting real-time WPM tracking, user accounts, and persistent performance history.
- Designed MySQL schema with a 3-table relational model to support scalable user performance tracking.
- Implemented a secure authentication system with hashed passwords and SQL injection protection.
- Stored and calculated WPM metrics.
- Deployed on Apache server with PHP and MySQL database. **Live Demo.**

## Extra Curricular

---

**Leadership:** First year class representative, took feedback from students to pass on to lecturers in monthly meetings to improve student satisfaction. *Jan 2026 - Apr 2026*

**Societies:** Computer Science Society, Weightlifting Society

## Technical Skills

---

**Languages:** Java, JavaScript, TypeScript, Python, PHP

**Frontend:** HTML, CSS, React, React Native

**Tools:** MySQL, Linux, Git, Spring Boot, PostgreSQL

**Certifications:** AWS Certified Cloud Practitioner, J.P. Morgan - Software Engineering Job Simulation
